## **This Film Is Not Yet Rated**

Other revelations in the film include: the discovery that many ratings board members either have children 18 and over or have no children at all (typically, the MPAA has suggested it hires only parents with children between the ages of 5 and 17); that the board seems to treat homosexual material much more harshly than heterosexual material (this assertion is supported by an MPAA spokesperson's statement in USA Today that "We don't create standards; we just follow them"); that the board's raters receive no training and are deliberately chosen because of their lack of expertise in media literacy or child development; that senior raters have direct contact in the form of mandatory meetings with studio personnel after movie screenings; and that the MPAA's appeals board is just as secretive as the ratings board, its members being mostly movie theater chain and studio executives. Also included on the appeals board are two members of the clergy (one Catholic and one Protestant, who may or may not have voting power). Prior to Sundance, the film sparked initial press interest when it was handed an NC-17 rating by the MPAA for "some graphic sexual content."
